Summary

I am currently a full-time university student, but since I have already advanced a little more than half of my degree, I want to start acquiring work experience to learn the technologies or tools that are used today in the market, as well as improve my soft skills to develop myself as a better person, which is what I try to do every day, at least become a little better than yesterday.

Skills in programming languages

Education

GRADUATING IN 2025
Escuela Superior de Cómputo - Instituto Politécnico Nacional
Bachelor of Engineering in Computational Systems
Finishing my fifth semester on June 29, 2023.
Actual G 3.3-B+ (88/100)
